Foundation & Grade Certification

Building Permit #: _____

I certify that the foundation footings for the property described as

are located to match both footprint location and building elevation as indicated on the approved plans.

Further, the property corners have been located as staked and an elevation benchmark has been established by me and is clearly marked.

This certificate must be signed and stamped by a licensed surveyor and/or engineer and returned to the City prior to the pouring of concrete.

Signature

License No.
